

City Hall Rotunda

The location of the City Hall was acquired by the City about 1840. An architectural competition for the design of the building was won with the French-styled plan that was inspired by the Hotel de Ville or City Hall of Paris. Its ornamental dormer windows and its former towers also recall architectural elements of the Chateau de Chambord on the Loire River in France.

Its central interior feature is a white marble rotunda, about 100 feet square, with a colored glass skylight above and a marble grand staircase opposite the main entrance.

The exterior of the first story is Missouri pink granite that contrasts with pink-orange Roman brick on the upper floors and buff color sandstone trim located in an irregular pattern around the window openings. The roof is burgundy-red clay tiles.
